

RURAL CUT OUT (15kv Class)

Application

The primary purpose of any cutout is to provide protection to the lines of your system and the various apparatus on those lines such as transformers and capacitor banks. M&P cutouts provide reliable protection from low-level overloads that just melt the fuse link, intermediate faults, and very high faults, through maximum interrupt capacity.

In each voltage class, there are continuous current ratings of 100 amps, 200 amps and 300 amps.
